

ANYSORT INC. 

Introducing

# ANYSORT RICE COLOR SORTER

# ANYSORT INC.

---

- We are a US based company.
- Proudly associated with and sole US, Canada, Mexico distributors of state of the art Color Sorter line from ANYSORT.
- Vision and strong commitment to serve the rice sector, by achieving complete three S solution.

# ANYSORT

---

- An intelligent color sorter line of machines.
- Manufactured by Anuhi Jiexun Optoelectronic Technology Co. Ltd.
- Adheres to independent R&D and technological innovation , and have revolutionized by producing the most advanced color sorting machine ever produced.
- Winner of the best machine in China International exhibition in 2014 for grain and oil products, where participants were from world over.

# ANYSORT

---

## NEXT BIG THING ( ANYSORT SC SERIES RICE COLOR SORTER ).

- ANYSORT SC series is the most advanced and revolutionary machine ever produced, foremost in technology, performance, precision and reliability.
- Big in capacity with 10 chutes and 640 channels.
- Throughput up to 20 tons per hour.
- Advantage of smaller footprint on the floor, saves on feeding and receiving associated machines if more machines are used.

# ANYSORT

---

## GO BEYOND IMAGINATION

- The first machine in the world with fully automatic features.
- One button click realizes full automation, adjusts all its parameters and sensitivity, without need of professional knowledge.

## BREAKTHROUGH IN INOVATION

- The machine can be operated and monitored by remotecontrol through smart phones or tablets, using internet any time and place.
- Uses secure Cloud technology to always stay updated on software.

## HIGHEST PRECISION

- The first machine with standard feature of HD full color CCD cameras to deeply and precisely recognize tiny spots, light yellow color and most impurities that normal color sorters cannot recognize.
- 

# ANYSORT

---

## COMPREHENSIVE MONITORING

- Global leading infrared technology is used to easily recognize glass and transparent plastic and stones.

## HIGEST ACCURACY

- High frequency solenoid valve exclusive to color sorters with ultra low air consumption and long life ensures high accuracy of nearly zero error.

## COMMITMENT TO QUALITY AND INNOVATION

- International leading linear array CCD chip and HD wide angle lens by NIKON customized for TOSHIBA HD full color camera, show perfect functions of intelligent CCD camera such as HD scanning , accurate identification and high computing.
- 

# ANYSORT

---

## INTELLIGENT DESIGN

- International top level multicore processing system with incomparable arithmetic capability and perfect program design create a new intelligent masterpiece

## GIGANTIC PERFORMANCE

- Using high performance LED optical system design and intelligent light control technology gives optimum performance

# ANYSORT

---

## SUPER RELIABLE

- Cutting edge technology delivers the most intelligent machine, super reliable, high on performance, and largest capacity.
